- Crete for Life
- Care for children and young people
in Greece

SPECIAL KNOWLEDGE

Web Development
PHP, Laravel, MySQL, HTML, Ccss,
Bootstrap

PC skills
Microsoft Office (Word, Excel,
PowerPoint)

OTHER

Hobbies
Programming, Workout

STATEMENT

My goal is to deepen my passion for computer science through a dual apprenticeship as an application development specialist and to gain practical experience in software development. I have already acquired basic knowledge in web development with PHP and Laravel.

My teamwork skills, perseverance, and strong communication abilities allow me to work effectively on projects. With my enthusiasm for technology and my willingness to continuously learn, I aim to contribute to the success of the company as part of a motivated team.

EXPERIENCE

Training as an IT specialist in application development

galabau workgroup GmbH / Aug. 2022 - June 2024

I work with PHP, Laravel, and MySQL to technically develop an industry-specific SaaS application.

Secondary school certificate

Commercial schools / Aug. 2020 - Jul. 2021

Extended vocational training maturity (EBBR)

Commercial schools / Aug. 2019 - Jul. 2020

Vocational school for technology (BST)

Carl von Ossietzky School / Aug. 2017 - Jul. 2019

Voluntary work in Greece

Supervision of young people, translations, etc. / Feb. 2016 - Mai 2017

Secondary school

Sulaymania, Irak / Okt. 2013 - Jan. 2016

PROJECTS

• Currency-Converter - HTML, CSS, bootstrap, PHP, Mysql, FreeCurrencyAPI.

The Currency Converter is a user-friendly app for converting between 32 currencies. It integrates with the FreeCurrencyAPI for up-to-date exchange rates. You can create, edit, or delete user profiles and view past conversions for financial tracking. It's a versatile tool for your currency conversion needs.

➤ [Click to view the project](#)

• Feature Voting - HTML, CSS, Vanilla PHP, Mysql (MariaDB).

Web application for coordinating features to be developed in a future SaaS solution. The project was developed without a framework, and the tool is also used internally in live operations.
